Dear Sir or Madam,

550940

Please understand that, for the record, I oppose the permanant storage facility at Yucca Mountain. We know how to contain and store waste, and maintain it in a relatively safe way without burrying it away under a mountain where it will eventually succumb to the earth's unpredictable and/or typical processes of attrition. Thank you for considering my concerns on this very important matter. The people in my community, and in many others are prepared to mobilize against transporting this dangerous radioactive matter on our roads and rails, but it would be better if we didn't have to. Thank you again for considering my concerns.

Sincerly,

Jacob H. Nelson

Idaho Falls, ID
